

# CAMROSE SOLAR HOME TOUR

Saturday, June 22 | 11 - 4

The Camrose Solar Home Tour returns for 2024 with even more to see and learn!

newo

Solar Harvest

## 4427 66 St.

Host: Stephen

### KEY DETAILS

- **System Size:** 5.4 kW
- **Location:** Roof-Mount
- **Energide Rating:** 165 GJ/year
- **Installer:** Newo
- **Date Installed:** 2022

### WHY THIS HOME?

Host Stephen is intrigued to share more about the fantastic performance of his panels. A major question from some is about performance in the winter and this stop can provide an excellent report on work to keep the panels clear of snow, resulting in no months in the past year when they did not produce more than they used. The host can also show the panel installation, the wiring setup and work done to better insulate their home (especially on joist ends).

### ENERGY SAVING FEATURES

- Added insulation in attic
- Replaced all doors and windows with energy efficient units
- Foam sealed all joist ends
- Investigating a heat pump
