

CAMROSE SOLAR HOME TOUR

Saturday, June 22 | 11 - 4

The Camrose Solar Home Tour returns for 2024 with even more to see and learn!

newo

Solar Harvest

7 Montrose Ave

Hosts: Greg & Emily

KEY DETAILS

- **System Size:** 6 kW
- **Location:** Roof-Mount
- **Energide Rating:** 142 GJ/year
- **Installer:** Solar Harvest
- **Date Installed:** June 2022

WHY THIS HOME?

The tour marks the completion of our second full year of our rooftop solar installation. We are interested in sharing more about the planning and process we took to install the system and the ups (and downs) of the first two years. We were completely net-zero electricity in our second year! We will also share thoughts on our household energy use and the importance of measuring and hopefully then lowering home energy consumption.

ENERGY SAVING FEATURES

- Additional attic insulation
- New windows and doors
- 6 kW rooftop solar system
- High efficiency appliances
- High efficiency electric hot water tank
- 2-stage high efficiency furnace
